The 1914 George Ranch is home to
Cat's Claw Fasteners, a Montana
Small Business

Ever needed to attach wire or
some thing similar to wood,
plastic or metal?

Well, Curt did and he hated what was
on the market, so he patented the
"Fence Claw"!

The Cat's Claw Fastener holds wire
tight to wood and plastic posts (Pipes
and other metal as well when a self
tapping screw is used in place of the
included roofing screw.) With well over
650 pounds of staying power when
combined with a traditional wood post,
the Cat's Claw is a game changer for
making fence lines last a long time.
Over time, the Cat's Claw is estimated
to save roughly \$1-5 per post in
operations costs. Bulk orders can be
negotiated, various payment
methods accepted though card or
check is preferred.

Magnetic
Hex Head Driver
INCLUDED IN
EVERY PACKAGE.

MSRP: \$60.50

**Bottle count 170
pre-assembled
fence claws**
